

SUN PROTECTION POLICY 2016

MWGC promotes a healthy and active lifestyle.

Our primary aim is encourage all children and families to adopt a healthy outlook towards life and we encourage safe practices for sun protection.

Most MWGC programs are conducted indoors or in shade protected areas away from direct UV rays. We do however occasionally attend or host excursions and outdoor activities that may expose children to direct sunlight.

This organisation adapts the safe practices of the Cancer Council of NSW and encourages the use of sunscreen.

Prior to any outdoor activities we will direct the children to apply sunscreen. We will encourage the use of sunscreen but cannot guarantee its complete use or total protection.

All sun products are to be provided by parents/carers and any allergies connected with their use must be stated in the MWGC Medical Advice and Consent Form.

If you require any further information please read the NSW Cancer Council SUNSMART GUIDELINE

All information regarding policies, terms and conditions is available on the MWGC website at
